Martim Oliveira

Product engineer · web, mobile, fintech

FOR FINTECHS, LENDERS, PAYMENT COMPANIES AND SMALL BANKS

One regulated piece, shipped properly

Banking software fails on details generalist contractors learn on your budget: core integrations, audit trails, payments that must never run twice, security reviews.

CHOOSE ONE PIECE

- Customer onboarding and identity verification (KYC) flow
- Customer portal or a mobile banking feature
- Back-office or operations dashboard
- Integration with a core banking system, banking-as-a-service provider or payment rail

PRICE

€8–25k

Fixed price per piece after scoping, or €450 per day. 50% to start.

EVERY PIECE INCLUDES

API contract written first · audit logging · money operations that are safe to retry · automated tests with coverage targets · security scanning in the pipeline · documentation your auditors can read.

Scope
API contract and acceptance criteria signed off

Build
Weekly demo against your test environment

Harden
Security scan, edge cases, load and failure tests

Release
Go-live support and handover

WHY ME

I have built a bank's homebanking channel (team of three, live in 2026) and designed and built a digital wallet for a bank — app, back end and back office — with AI agents. The wallet has been sold to the bank.

Start with a 15-minute call.

Tell me what you need; you get a fixed scope and price within two working days.
